Surgical Partners of Oklahoma

POST-SURGERY OPIOID CONSENT FORM

Instructions: *Please review the information listed below and put your initials next to each item when you have reviewed it with your provider and feel you understand and accept what each statement says.*

Patient Name:	**Date of Birth:**
	Initials
My provider is prescribing the medication indicated above to help me control and manage post-surgical pain.	
This medicine is used to decrease and manage my pain but will not take away my pain completely.	
I will stop using the opioid medicine as soon as my pain is manageable and will use over the counter pain relievers if possible to manage the pain.	
I will contact my provider if the medicine does not control my pain when I take it as prescribed or if I have any adverse reactions to it.	
I will follow-up with my provider for post-surgical consultations as instructed or requested by my provider.	
If I do not use all of the medicine prescribed, I will ensure that it is disposed of properly in order to prevent its misuse by someone else.	
I will safely store the medicine to minimize the risk of children or other people taking it.	
When I take this medicine it may not be safe for me to drive a car, operate machinery, or take care of other people. If I feel sedated, confused, or otherwise impaired by these medications, I should not do things that would put other people at risk for being injured.	
When I take this medication, I may experience certain reactions or side effects that could be dangerous, including sleepiness or sedation, constipation, nausea, itching, allergic reactions, problems with thinking clearly, slowing of my reactions, or slowing of my breathing.	
I may become physically or psychologically dependent or addicted to this medicine if I take them continuously so I agree to stop using them at the earliest possible time and to take no more than is necessary to control my pain.	
I have told my provider if I or anyone in my family has had any problems with mental illness or with controlling drug or alcohol use in the past.	
Taking too much of my pain medication, or mixing my pain medications with drugs, alcohol, psychiatric medicine, or other medications that cause sleepiness, such as benzodiazepines, barbiturates, and other sleep aids, could cause me to be dangerously sedated or to overdose and stop breathing.	
It is my responsibility to tell any provider that is treating me or prescribing me medications that I am taking opioid pain medications so that they can treat me safely and do not give me any medicines that may interact dangerously with my pain medicines.	
I will not use any illegal substance, such as cocaine, etc., while taking this medicine.	
If I travel out of the country while taking this medicine, I will notify the appropriate travel authority (usually the consulate website of the country) and obtain a note from my provider before travel, as traveling out of country with opioids may pose problems.	
For females: I understand it is my responsibility to inform my provider if I am pregnant.
